State of Wisconsin Department of Natural Resources (DNR) PO Box 7921, Madison WI 53707-7921 dnr.wi.gov

CONSTRUCTION SITE INSPECTION REPORT

Form 3400-187 (R 11/16)

Page 1 of 2

Notice: This form was developed in accordance with s. NR 216.48 Wis. Adm. Code for WPDES permittees' convenience; however, use of this specific form is voluntary. Multiple copies of this form may be made to compile the inspection report. Inspections of the construction site and implemented erosion and sediment control best management practices (BMPs) must be performed weekly and within 24 hours after a rainfall event 0.5 inches or greater.

|----------|--|-------------|---|-------------------------|--------------------------------------|
| Ins | pection Questions: | Yes | No (Identify Actions Required): | Location/Comments: | Actions Completed by Date & Initials |
| 7. 8. | Is the public right of way curb line free of tracked soil and accumulation? Are wetlands, lakes, streams, ditches, or storm sewers downstream of the site free of sedimentation and | | ☐ Install tracking pad ☐ Widen/lengthen pad ☐ Amend stone/Add geotextile ☐ Install wheel washing station ☐ Close entrance/exit ☐ Limit traffic across disturbed areas ☐ Sweep road and curb line ☐ Repair/Replace erosion control ☐ Add sediment controls | | |
| | turbid water leaving the site? ³ | | ☐ Modify operations ☐ Contact DNR to verify extent of cleanup required | | |
| 9. | Is dewatering and/or vehicle and equipment washing being done in a manner that prevents erosion and sediment discharge? | | ☐ Install treatment train ☐ Install energy dissipation ☐ Modify discharge location ☐ Modify intake to reduce sediment | | |
| 10. | Are soil stockpiles existing for more than 7 days covered and stabilized? | | Seed Install mat/mulch/polymer Cover with tarp/plastic sheeting | | |
| 11. | protected from scour and erosion? | | ☐ Install energy dissipation at outfall ☐ Install ditch checks ☐ Install slope interruption ☐ Install onsite detention | | |
| 12. | Are good housekeeping practices or treatment controls in place to prevent the discharge of chemicals, cement, trash, and other materials into wetlands, waterways, storm sewers, ditches, or drainage-ways? ⁴ | × | □ Properly dispose of trash □ Provide concrete washout station □ Contact DNR to verify extent of cleanup required | | |
| 13. | Is the plan reflective of current site operations and does it address all erosion and sediment control issues identified during the inspection? | \boxtimes | ☐ Revise sequence ☐ Revise sediment control BMP ☐ Revise erosion control BMP ☐ Revise post-construction storm water BMP | | |
| 14. | Are all areas where construction has temporarily ceased (and will not resume for more than 2 weeks) temporarily stabilized? | | ☐ Topsoil & seed ☐ Install mat/mulch/polymer ☐ Cover with tarp/plastic sheeting | | |
| 15. | Are all areas at final grade permanently vegetated or stabilized with other treatments? | | ☐ Topsoil & seed☐ Install mat/mulch/polymer☐ Sod☐ Install stone base | | |
| 16. | Have temporary sediment controls been removed in areas of the site that meet the permit definition of 'final stabilization'? | | Water to establish vegetation Repair or reseed areas Remove temporary practices | | |

³ If sediment discharge enters a wetland or waterbody, the permittee should consult with DNR staff to determine if sediment cleanup and/or additional control measures are required.

⁴ The permittee shall notify the DNR immediately via the spills hotline at (800)943-0003 of any release or spill of a hazardous substance to the environment in accordance with s. 292.11, Wis. Stats., and ch. NR 706, Wis. Adm. Code.
